

To whom it may concern:

Please do NOT support the use of a "broadcast flag" for use in digital television broadcasts.

It would wrongfully encroach upon my rights as a user of broadcast television. I still want to be able to record digital television in the exact same way I am legally allowed to record analog television today. Putting the control in a few Hollywood individuals for the decision of whether I am or am not allowed to record something that I am (by them) allowed to view is not only an erosion of my current fair use rights, but it is just plain wrong.

If you would like a synopsis with other valid reasons from a web site I found, please look here:
